

Jayden Blair

(908) 531-7809 | jsblair300@gmail.com | www.linkedin.com/in/jayden-s-blair | <https://jaybobjr.github.io/Portfolio/>

TECHNICAL SKILLS

Languages: SQL, Python, JavaScript, HTML/CSS

Tools & Platforms: Power BI, GitHub, Slack, Trello, Pandas

Collaboration: Agile Methodologies, Sprint Planning, Documentation, Cross Functional Communication

EDUCATION

Bachelor of Science in Computer Science

Expected: Dec 2026

University of Arkansas, Fayetteville, AR

Relevant Coursework: Software Engineering, Algorithms, Database Management Systems

LEADERSHIP & TECHNICAL EXPERIENCE

Industry-Sponsored Embedded AI Safety Device | Python

Spring 2026 - Present

- Leading a cross-functional engineering team developing an embedded AI safety device for real-time injury detection using accelerometer and voice-signal analysis.
- Coordinated stakeholder communication, technical documentation, balancing user needs, and sprint planning between engineers and industry sponsors to ensure alignment on requirements and deliverables.
- Supporting development priorities for low-power embedded systems, including lightweight AI/ML models and LoRa-based emergency communication while balancing performance and usability constraints.

Sales Performance Analytics Dashboard | SQL, Power BI, Excel

Summer 2026

- Built a sales analytics dashboard using SQL and Power BI to process and analyze 50,000+ sales records across 12 data fields for business performance evaluation and operational insight generation.
- Transformed raw transactional data while developing KPI metrics including total revenue, average order value, total orders, and product sales performance tracking to help prioritize areas for business growth.
- Created interactive sales trend and product performance visualizations, improving visibility into customer purchasing behavior and supporting data-driven business decision-making.

Lazer Tag Software | Python, GitHub, Slack, Trello

Spring 2026

- Partnered with a cross-functional team to develop a laser tag management system by translating functional requirements into user focused features and iterative product improvements.
- Supported Agile development by organizing sprint tasks, prioritizing backlog items, and coordinating team communication through Trello, GitHub, and Slack.
- Participated in testing and documentation efforts to validate functionality, improve the user experience, and deliver reliable product releases.

Stadium Builds Platform | HTML, CSS, JavaScript

Summer 2025

- Co-led the development of a responsive web platform that enables individuals to save and organize their needs after identifying a recurring concern within the company's community.
- Prioritized features, milestones, and designed a scalable foundation for future refinement and user needs.

WORK EXPERIENCE

University of Arkansas Residential Assistant (RA), Fayetteville AR

July 2025 – Present

- Managed a residential community of approximately 500 apartment rooms, ensuring a safe, structured, and inclusive living environment.
- Resolved resident concerns and coordinated with university staff to support an additional 100+ residents, ensuring timely communication and effective issue resolution.
- Planned and executed community engagement events, improving resident participation and strengthening campus involvement through organized programming and outreach.

Front Desk Manager, Southlake Gymnastics Academy, Southlake Tx

April 2016 – Jan 2022

- Managed scheduling, payments, and enrollment using a custom-built application.
- Coordinated staff to optimize scheduling, resolve issues, and ensure efficiency and customer satisfaction
- Promoted from coach to camp and front desk manager due to adaptability and interpersonal skills.
